

TRAINING MANUAL • V2

Inbound Support Team

Training Manual for the Inbound Customer Care Division

"Answer the call. Own the outcome."

AGENDA

What you'll master in this module

Six sections covering environment setup, call protocol, AUX codes, email capacity, delivery SLAs, policies, and cross-team workflows.

REVIBE

01

Onboarding & Environment

Work profile, tools, ZIWO setup

02

Inbound Call Protocol

5-second rule, opening script, language ID

03

AUX Codes & Time Management

Status codes, break allowance, ATT

04

Outbound Emails & Capacity

3 authorized scenarios, CSAT rule

05

Delivery SLAs & Revibe Express

Regional windows, express eligibility

06

Policies & Workflows

Cancellations, returns, warranty, Gorgias, Slack

01

Onboarding & Environment

Set up your work profile, accept tool invitations, and configure ZIWO for stable call handling.

Set up your work profile

First task on day one — keep work and personal life separated.

REVIBE

? Why a separate profile?

-  Separates work bookmarks, logins, and extensions from personal browsing.
-  Reduces distraction — no personal notifications during calls.
-  Security: company tools (ZIWO, Gorgias, Slack) stay in an isolated profile.
-  Lets you sync only work-related Chrome data to your work account.
-  You can sign out of the work profile at end of day without touching personal tabs.

▶ How to create it

- 1 Open Chrome → click your profile icon (top-right).
- 2 Click "Add" at the bottom of the profile list.
- 3 Click "Continue without an account."
- 4 Name it "Revibe Work" and pick a distinct color/icon.
- 5 Sign in to all Revibe tools inside this profile only.

WHY

If you mix personal + work tabs, Chrome will freeze ZIWO to save memory — and you'll drop calls.

ONBOARDING

Tools we use every day

Three core tools. Master them on day one.

REVIBE

PRIMARY COMMS

Slack

- Primary internal communication channel.
- Check #cc-inbound at start of every shift.
- Escalations and cross-team requests happen here.
- Respond to mentions within 15 minutes during shift.

SCHEDULING

Google Calendar

- All meetings and 1-on-1s live here.
- Accept invites within 24 hours.
- Failing to attend = recorded as a no-show.
- Check it every morning before opening ZIWO.

UPDATES

Email

- Check daily at the start of your shift.
- Company updates and policy changes arrive by email.
- Forward anything urgent to your Team Lead in Slack.
- Use your @revibe.me address only.

Set all three tools as startup tabs in your Revibe Work Chrome profile — they open automatically every morning.

Accept your tool invitations

Sal Berg (Account Manager) sends invites for all internal tools. Set them up on your work profile immediately.

REVIBE

Step-by-step

- 1 Watch your work email inbox during onboarding week.
- 2 Look for invitations from Sal Berg for: **ZIWO, Gorgias, Slack, Orders App, Claims App, Google Workspace.**
- 3 Click each invite link from inside your Revibe Work Chrome profile.
- 4 Set up 2FA (two-factor authentication) on every tool that offers it.
- 5 Save login credentials in your work profile password manager only.
- 6 Reply to Sal confirming each tool is set up and accessible.

Onboarding timeline (Day 1–5)

- DAY 1** Create work profile + accept Slack + Calendar
- DAY 2** Accept ZIWO + configure RAM exception (next slide)
- DAY 3** Accept Gorgias + Orders App + Claims App
- DAY 4** Shadow calls with a senior agent
- DAY 5** Take first live calls under TL supervision

IF STUCK

DM Sal Berg in Slack #cc-inbound with the tool name + screenshot of the error.

Disable Chrome RAM Saver for ZIWO

Chrome freezes inactive tabs to save memory. If it freezes ZIWO, you drop calls. Fix this on day one.

REVIBE**CRITICAL**

ZIWO is a phone in your browser. If Chrome puts it to sleep, incoming calls ring silently or drop. Adding ZIWO to the memory exception list is **mandatory**.

☰ Add ZIWO to the exception list

- 1 Open Chrome → click the 3-dot menu (top-right) → **Settings**.
- 2 Select **"Performance"** from the left sidebar.
- 3 Find the **"Always keep these sites active"** section.
- 4 Click **"Add"** and paste these two URLs, one at a time:

- `v1.app.ziwo.io`
- `app.ziwo.io`

- 5 Click **Add** after each. Confirm both appear in the list.

🔘 Alternative — turn off Memory Saver entirely

If you prefer a single switch:

- In the same Performance settings page, toggle **OFF** the "Memory Saver" switch completely.
- This stops Chrome from freezing ANY inactive tab — uses more RAM but prevents all call drops.

SCREENSHOT PLACEHOLDER

Chrome → Settings → Performance → "Always keep these sites active" with ZIWO URLs added

VERIFY After setup, leave ZIWO open for 30 minutes. If the tab doesn't dim/freeze, you're good.

3 things to remember

REVIBE

01

WORK PROFILE

Create a separate Chrome work profile named **"Revibe Work"** — all company tools live there, isolated from personal browsing.

02

THREE CORE TOOLS

Master the 3 core tools: **Slack** (primary comms), **Google Calendar** (no-shows are tracked), **Email** (daily updates). Set them as startup tabs.

03

ZIWO MEMORY EXCEPTION

Add **v1.app.ziwo.io** and **app.ziwo.io** to Chrome's "Always keep these sites active" list. If Chrome freezes ZIWO, you drop calls.

CHECK

You're set up. Now let's handle inbound calls.

02

Inbound Call Protocol

The 5-second rule, language identification, and the mandatory opening script that every call starts with.

The 3 non-negotiable inbound rules

Every call. No exceptions. QA monitors all three.

REVIBE

RULE 01

The 5-Second Rule

Answer every inbound call **within 5 seconds of the first ring**. QA handles ZIWO recording contextually — a slight system delay in the display is normal. The clock starts at the ring, not when you see it.

RULE 02

Language Identification

Check the ZIWO HUD indicator for the caller's preferred language **BEFORE you speak**. Maintain a zero-background-noise environment at all times — mute when not speaking.

RULE 03

Mandatory Opening Script

"Thank you for calling Revibe, this is [Your Name], how can I help you today?"

Word-for-word. Do not improvise the greeting. Personalize only with your name.

All three rules are **QA-scored**. Missing any one drops your quality score for that call.

CALL PROTOCOL

Outbound calls & post-call survey

Re-introduce yourself fast. Transfer to the survey correctly every time.

Outbound re-introduction window

5s

RE-INTRO WINDOW

On outbound calls, you have **5 seconds** to re-introduce yourself before the customer hangs up.

"This is [Your Name] from Revibe calling you back regarding..."

State your name, company, and the reason for the callback in one breath.

Survey transfer protocol (3 steps)

- 1 Click the **"No Survey"** icon on the telephony panel.
- 2 Select the survey language that **matches the customer's interaction language**.
- 3 Terminate the call from your side — the customer is auto-transferred to the survey.

Never hang up without transferring — the customer won't receive the survey and CSAT is lost.

REVIBE

KEY METRIC — AVERAGE TALK TIME (ATT)

6–7

MIN TARGET

ATT must stay **between 6 and 7 minutes**.

TOO SHORT

Under 6 min — rushing the customer, missing empathy, or cutting resolution.

TOO LONG

Over 7 min — inefficiency, not using macros, or repeating information.

TRIGGERS QA REVIEW

Both directions trigger a QA review of the call recording.

3 things to remember

REVIBE

01

SPEED & LANGUAGE

Answer within **5 seconds**. Check ZIWO HUD for the caller's language before speaking. Zero background noise.

02

OPENING SCRIPT

Opening script is mandatory: *"Thank you for calling Revibe, this is [Name], how can I help you today?"* Word-for-word, every call.

03

ATT & SURVEY

ATT target is **6–7 minutes**. Too short or too long triggers QA review. On outbound, re-introduce in 5 seconds. Always transfer to the survey.

CHECK

You've got the protocol. Next up: AUX codes & time management.

03

AUX Codes & Time Management

Status codes, daily break allowance, and how your time is tracked across the shift.

AUX CODES

Status codes — when and how

Four AUX codes control your availability. Return to Available immediately after every task.

REVIBE

STATUS CODE	USE CASE	GUIDELINES
 Available	Ready to receive inbound queue calls	Default status. Return here immediately after every call or task. This is where you should be 80%+ of your shift.
 Meeting AUX	1-on-1 sessions, coaching, QA calibrations	Only when actively in a scheduled meeting with TL, QA, or weekly team meeting. Calendar invite required.
 Break AUX	Total 1 hour daily allowance	Breakdown: 15 min (first break) + 30 min (lunch) + 15 min (second break). Do not exceed. Breaks do NOT carry over.
 Outgoing AUX	Manual callbacks to customers or couriers	Used only for outbound follow-ups. Not for personal calls. Switch back to Available the moment the call ends.

QA monitors AUX code usage weekly. **Excessive Break AUX or Outgoing AUX without call logs triggers a coaching session.**

AUX CODES

Your daily break budget

60 minutes total. Use it wisely. No carryover to the next day.

REVIBE

15 min

FIRST BREAK

Use mid-morning when call volume dips.

30 min

LUNCH

Standard lunch window. Coordinate with your TL.

15 min

SECOND BREAK

Use mid-afternoon to reset before end-of-shift.

🚫 Break rules

DO

- ✓ Log every break in Break AUX — never Available during a break.
- ✓ Coordinate lunch with your TL to maintain queue coverage.
- ✓ Take your first break after 2 hours of calls minimum.

DON'T

- ✗ Don't exceed 60 min total — system flags it automatically.
- ✗ Don't split breaks into smaller chunks (no 5-min snacking).
- ✗ Don't carry over unused time — it resets at midnight.
- ✗ Don't take breaks during peak call volume (12–3pm).

04

Outbound Emails & Capacity

When you may send an outbound email — and when you must not.
Protecting queue capacity is everyone's job.

OUTBOUND EMAILS

When you may send an outbound email

Only 3 scenarios. Anything else — use Gorgias inbound reply or Slack.

REVIBE

⚠ CSAT CAPACITY RULE

Do NOT create separate outbound email tasks purely for general CSAT tracking. This protects queue capacity for genuine customer issues.

01

Customer Unreachable via Phone

After multiple failed call attempts, send an email summarizing the resolution or next steps. Note the call attempts in the ticket.

02

Written Confirmation Requested

When a customer explicitly asks for written confirmation of a call resolution, send it via Gorgias outbound email. Quote the resolution agreed on the call.

03

Essential Documents

When sending invoices, promo codes, or other essential documents that require email delivery. Attach from the Orders App, not your desktop.

⊘ Anything outside these 3 scenarios = use Gorgias inbound reply (if customer emailed) **or Slack** (if internal). Never create new outbound email threads for CSAT chasing.

05

Delivery SLAs & Revibe Express

Regional shipping windows, Revibe Express eligibility, and weekend rules — so you quote accurate timelines to customers.

DELIVERY SLAS

Global delivery windows

Quote these to customers asking about shipping times. Weekends = Saturday + Sunday (not counted in business days).

REVIBE

🇦🇪 United Arab Emirates

1–3 BUSINESS DAYS

FASTEST

Local courier. Tracking sent within 24 hrs of dispatch.

🇸🇦 Saudi Arabia

5–7 BUSINESS DAYS

Customs clearance may add 1–2 days. Inform customer.

🇿🇦 South Africa

3–5 BUSINESS DAYS

Local courier. No customs delays within SA.

🇵🇭 Asian Countries

2–4 BUSINESS DAYS

PH, TH, MY, HK, ID. Customs varies by country.

⚡ **Revibe Express** **Delivery within 24–48 hours.**

AVAILABLE IN

- ✓ UAE ONLY.
- ✓ Selected eligible devices only.
- ✓ Customer selects at checkout.

NOT AVAILABLE

- ✗ KSA, South Africa, Philippines, or international.
- ✗ Weekends (Saturday + Sunday) excluded.
- ✗ Bulky items (TVs, large laptops).

06

Policies & Workflows

Reimbursements, cancellations, returns, warranty, Gorgias workspace, Slack escalation, and cross-team delegation.

Logistics & accessory reimbursements

Two reimbursement scenarios — courier overcharge and faulty charger within the 10-day window.

REVIBE

Courier overcharge protocol

The customer must pay first — Revibe reimburses after. **Never promise a prepayment.**

Faulty charger compensation (within 10-day window)

DEVICETYPE	ORIGINAL PAYMENT METHOD (OPM)	STORECREDIT (SC)
	30 AED	40 AED
Laptop	50 AED	50 AED
	70 AED	80 AED

WHY OPM < SC Store credit reimbursement is slightly higher to incentivize retention over refund.

 **Charger claims OUTSIDE the 10-day window are not eligible for reimbursement** — process as a warranty claim instead.

POLICIES

Order cancellations & SLA matrix

Always prioritize retention before processing. Offer alternatives or timeline updates first.

REVIBE

 **RETENTION FIRST** — Before quoting any cancellation fee, attempt one retention line (discount, expedited delivery, or alternative product). If customer insists, apply the matrix below.

WITHIN SLA

Change of Mind (Not Shipped)

UAE / KSA

5% deduction (OPM)

0% (Store Credit)

SOUTH AFRICA

0% deduction (both OPM and SC)

OUTSIDE SLA

Delivery Delay (Not Shipped)

Full refund OPM

OR

Full Store Credit + Compensation Bonus:

100 AED/SAR

500 ZAR

DELAYED & SHIPPED

Refused Delivery (RTO)

UAE / KSA

10% deduction

SOUTH AFRICA

0%

ANY OTHER COUNTRY

Deduction equiv. to 20% + 225 AED

24-Business-Hour Tracking Rule

Verify supplier status within **24 business hours** for any stuck order. Escalate to Management if no movement — do not let a customer wait without an update.

Refund policy — the 2 rules

Two refund types. The cap logic differs. Memorize this.

01 CHANGE OF MIND

Customer changed their mind

- Includes refusing delivery (RTO). Same policy either way.
- **90% refund** (100% in South Africa)
- + Store credit bonus — **CAPPED**.

CAP RULE Refund + bonus can NEVER exceed the order total.

02 ISSUE / SELLER'S FAULT

Revibe's fault

- Wrong item, defective item, or seller-caused shipping problem (RTO). Verified by the team.
- **100% refund (every country)**
- + Store credit bonus — **NOT CAPPED**.

NO CAP Can push total above the order amount.

WORKED EXAMPLE — CHANGE OF MIND CAP

ORDER 500 → **90% REFUND 450** → **+100 BONUS** would be **550** (over 500) → **ONLY ADD 50** → **capped at 500 (100%)**

The bonus is reduced so the total never exceeds what the customer originally paid.

STORE CREDIT BONUS BY COUNTRY (REFERENCE)

9 markets • local currency

COUNTRY	BONUS AMOUNT
AE	100
SA	100
ZA	500
TH	855
PH	1,605
MY	110

10-day return window & warranty

Two policies: the 10-day return evaluation and the warranty tiers. Know both cold.

10 THE 10-DAY RETURN WINDOW (RETURN CLAIM)

Days from delivery receipt

✓ DEFECT CONFIRMED BY QC

Full refund issued. No deductions applied.

× MISUSE OR NO ISSUE FOUND

Claim invalidated. Customer pays return re-shipping costs.

12-MONTH STANDARD

Standard Warranty

- ✓ Free coverage for manufacturing malfunctions only.
- ✓ Screen issue (no misuse) — covered within the **FIRST 6 MONTHS** only.
- ✗ Screen/LCD damage **STRICTLY EXCLUDED** unless reported within first 10 days.
- ✗ Normal wear, accidental damage, and liquid damage **NOT covered**.

24-MONTH CARE+

Revibe Care+ Warranty

- ✓ Extended coverage including accidental damage and misuse.
- i Limited to **ONE claim** per warranty period.
- Regional claim caps: **1,500 AED/SAR | 7,200 ZAR | 24,000 PHP**.

WAREHOUSE PROCESSING SLA

From warehouse arrival for quality inspection. Communicate this timeline to customers opening warranty claims.

13 DAYS

Gorgias workspace & self-service

Document every call. Close every ticket. Never raise claims on behalf of customers.

🗨️ TICKETING WORKFLOW

- 1 Document ALL actions and calls as an "Internal Note" within the ticket thread at revibe.gorgias.com.
- 2 If no DOCS thread exists yet, create one.
- 3 Report what happened in the call inside the internal note — customer's name, issue, resolution, next steps.
- 4 Tag the ticket with the correct topic + sentiment + country tags.

⚠️ CRITICAL STEP

Always click "Send & Close" to archive tickets properly.

Open tickets skew team metrics. A ticket left open counts against your resolved-tickets KPI even if the issue is solved.

🗎 SELF-SERVICE RULE — CRITICAL

DO NOT We should **NOT** raise return or warranty claims for customers.

Guide them to submit claims directly through the self-service portal:

01

Navigate to revibe.me/pages/my-account

02

Customer logs in via OTP verification

03

Submit claims & track real-time inspection updates

WHY

Self-service claims are faster, auditable, and the customer sees live status — no back-and-forth with the agent.

Slack posts & manager call escalations

Structured posts = instant triage. Follow the template exactly.

REQUIRED POST FORMAT

Every post to cross-functional teams should follow this exact format:

Order Number: _____

Supplier: _____

Issue: _____

Action Required: _____

Structured posts enable instant triage and reduce back-and-forth delays.

WHY Freeform posts get ignored. Templated posts get actioned within the SLA.

MANAGER CALL ESCALATION FLOW

STEP 1

Customer demands a manager / legal threat / social-media risk.

STEP 2

Notify **#cc-escalation-calls** immediately with the post template + call recording link.

STEP 3

Manager SLA: resolution within **1-3 working days**. You stay owner of the ticket throughout.

SCREENSHOT PLACEHOLDER

Slack **#cc-escalation-calls** — example escalation post with the 4-field template filled in

Operational **Slack** channels

Know which channel to post in. Wrong channel = delayed response.

CHANNEL DIRECTORY

CC-INBOUND

General inbound team communication and reporting to management.

CC-INBOUND-BREAKS

Break schedule coordination and swap requests.

CUSTOMER-CARE

Company-wide announcements and policy updates.

ORDER-CONTACT-UPDATES

Order status changes and supplier coordination.

CC-OPS-CLAIMS-ATTACHMENTS

Claim document uploads and commercial invoice requests.

CC-ANNOUNCEMENTS

Customer Care division announcements.

COMMERCIAL INVOICE REQUEST FLOW

01

Drop details in **#cc-inbound**

02

SME/TL generates invoice in thread

03

Attach to Gorgias email

Never generate invoices yourself. SME/TL has the template + finance approval.

TIP

Pin the channel directory in your work Chrome profile for quick reference.

Who does what — cross-functional teams

Three teams you'll hand off to. Know their scope so you escalate to the right place.

TEAM 01

Quality Control & Warehouse (Suppliers)

Manage physical device receipt and processing.

- Owns the 13-day quality inspection SLA from warehouse arrival.
- Report defect confirmation, no-defect findings, or misuse detection.

Escalate to: **#cc-ops-claims-attachments**

TEAM 02

Orders / Operations Team

Liaise with third-party sellers and suppliers.

- Pull back shipped inventory when needed.
- Modify admin statuses and update order details.
- Mark RTOs (Return to Origin).

Escalate to: **#order-contact-updates**

TEAM 03

Claims Team

Manages the claims process start to finish once the customer raises a claim through the website.

- Follows up with suppliers and customers alike.
- Completes the customer's claim end-to-end.

Escalate to: **#cc-ops-claims-attachments**

Not sure which team owns it? Post in **#cc-inbound** with the issue — the TL will route it. Better to ask than to mis-escalate.

3 things to remember

Three takeaways from the Policies & Workflows section — what every Revibe TM must carry into every shift.

01

Reimbursements: courier overcharge = customer pays first, get receipt, submit claim. Faulty charger within **10 days** = use the device-type table (Phone 30/40, Laptop 50/50, MacBook 70/80 AED).

02

Cancellations: always retain first. Within SLA = **5% OPM / 0% SC** (UAE/KSA), **0%** (SA). Outside SLA = full refund or SC + bonus. Refused delivery = **10%** (UAE/KSA), **0%** (SA), **20%+225 AED** (other). **24-hr tracking rule.**

03

Returns: **10-day** window, defect = full refund, misuse = customer pays shipping. **Warranty:** **12-mo** standard (screen only 6 mo) or **24-mo Care+** (1 claim, regional caps). **Gorgias:** document calls, **Send & Close**, never raise claims for customers — guide to self-service.

Cheat sheet — print this

One-page quick reference for live call handling.

CALL RULES

- Answer: within **5 sec**
- Opening: *"Thank you for calling Revibe, this is [Name], how can I help?"*
- Language: check ZIWO HUD first
- ATT: **6-7 min** (QA review if off)
- Outbound re-intro: **5 sec**

AUX CODES

- **Available** — default, **80%+** of shift
- **Meeting** — calendar invite only
- **Break** — **60 min/day** total (15+30+15)
- **Outgoing** — callbacks only
- Return to Available after every task

DELIVERY SLAS

- UAE: **1-3 days** (fastest)
- KSA: **5-7 days**
- South Africa: **3-5 days**
- Asia: **2-4 days**
- Revibe Express: **24-48h**, UAE only

POLICY QUICKS

- Cancel within SLA: **5% OPM / 0% SC** (UAE/KSA)
- Cancel SA: **0%**
- Refund change-of-mind: **90% (100% SA)**, capped
- Refund seller fault: **100%**, uncapped
- Return window: **10 days**
- Warranty: **12-mo / 24-mo Care+**
- Charger: **30/40, 50/50, 70/80 AED**

★ GOLDEN RULES

Document every call as an internal note • Send & Close every ticket • Never raise claims for customers — guide to self-service • When in doubt, ask your Team Lead.

V2 — what's new

Changes from V1 of the Inbound Support Training Manual.

+ ADDED

8 ITEMS

- + Section dividers for all 6 modules
- + Section recap slides (3 key takeaways each)
- + Quick-reference cheat sheet
- + Worked example for refund cap logic
- + Screenshot placeholders for ZIWO setup + Slack escalation
- + Cross-functional team delegation card
- + Onboarding day-by-day timeline
- + ATT too-short / too-long QA triggers

🔧 CLARIFIED

6 ITEMS

- ✓ AUX break allowance — 60 min total, no carryover
- ✓ 3 authorized outbound email scenarios
- ✓ Revibe Express — UAE only, eligible devices only
- ✓ 24-business-hour tracking rule for stuck orders
- ✓ Self-service rule — never raise claims for customers
- ✓ Send & Close critical step for Gorgias tickets

! NEEDS SME INPUT

5 ITEMS

- ! Confirm store-credit bonus amounts by country (slide 23)
- ! Verify Care+ regional claim caps (slide 24)
- ! Confirm KSA customs delay range (1–2 days?)
- ! Validate charger reimbursement amounts for non-UAE markets
- ! Verify weekend definition for each market (Sat+Sun everywhere?)

END OF MODULE

You're ready.

Revibe Inbound Support Operations — Training Complete
